

## **Sustainable Vegetation Solutions**

Russell Chambless, Pennington Seed

Sustainable vegetation solutions, hydraulically applied erosion control and green engineering alternatives for storm water runoff.

*Russell Chambless is the Senior Business Development Manager for Pennington Seed, Inc. based out of Madison, GA. Pennington Seed is the leading producer of turf grass seed in the United States and the only seed producer who researches, develops, and markets their own varieties. Russell has been with Pennington Seed for over 10 years and has been involved with the Professional Seed industry for the past 6 years. He is regularly involved with engineers, architects, regulators, and commercial installers in the erosion and sediment control industry throughout the southeast to develop site solutions and specifications. Russell is a Certified Professional in Erosion and Sediment Control (CPESC).*

*Pennington Seed has been involved in developing and researching vegetative solutions for erosion control. Russell will speak on some of the basics to produce a long term sustainable vegetation for erosion control as well as some of the stabilization products available on the market today.*
